

ATTACHMENT 9 CONTINGENCY PLAN

9.1

GENERAL INFORMATION

The contingency plan for U.S. Army Chemical Agent Munitions Disposal System (CAMDS) is designed to minimize hazards to human health and the environment from fires, explosions, or any unplanned sudden or non-sudden release of oil, hazardous waste, or hazardous constituents to air, soil, or surface water. The specific assigned CAMDS responsibilities and procedures are listed in the CAMDS Site Contingency and Spill Plan, Site Plan 57-05) (current revision). Specific procedures for an emergency are given in the following CAMDS Standing Operating Procedures (SOPs):

- EMR 35-00-99-01 – CMO Response to CAMDS Site Emergencies. This SOP will be modified to include incinerator systems other than the MPF if/when CAMDS plans to operate other incinerator systems
- EMR 99-00-99-01 - CAMDS Site Emergencies.
- EMR 66-00-00-02 - Fire /Chemical Accident/Incident in the Lab.

Contingency and emergency response plans for all of Deseret Chemical Depot (DCD) are:

- Deseret Chemical Depot Installation Spill Contingency Plan (DCD-ISCP)
- Deseret Chemical Depot Spill Prevention Control and Countermeasures Plan (DCD-SPCCP)
- Deseret Chemical Depot Accident/Incident Response and Assistance Plan (DCD-CAIRAP)
- Deseret Chemical Disaster Control Plan (DCD-DCP)

9.3

IMPLEMENTATION

The Emergency Response Flow Chart from the CAMDS Site Contingency and Spill Plan, Site Plan 57-05 (current revision), shows when the contingency plan is to be implemented. The summary is as follows:

A spill is discovered, contained, and the Control Module Operator (CMO) is contacted by dialing 4400. The CAMDS Control Module (CM) is staffed 24 hours a day, 365 days a year.

For non emergency -	CAMDS Site Contingency and Spill Control Plan, Site Plan 57-05, (current revision) is activated. This plan details responsibilities and general actions by position.
	CAMDS Site Area Response Team (ART) Guide, IM399-07-10 (current revision), details names of individuals, the training they have received, and their ART assignments. This plan also details generic spill cleanup procedures, lists reportable quantities, and also gives the location and types of equipment that may be used for spill cleanup. This plan is available at emergency response locations throughout CAMDS.
For emergency -	Deseret Chemical Depot Installation Spill Contingency Plan (DCD-ISCP) or Deseret Chemical Depot Spill Prevention Control and Countermeasures Plan (DCD-SPCCP) is activated.
For Natural Disasters	Deseret Chemical Depot Disaster Control Plan (DCD-DCP) is activated
For Agent emergency	Deseret Chemical Depot Chemical Accident/Incident Response and Assistance Plan (DCD-CAIRAP) are activated.
